

An ecological charity hashar was held at the Institute

From ancient times, our ancestors used to live in clean, neat place and they believed that this will bring happiness and prosperous to the family. The cleanliness of the place we live in also allows us to maintain our well-being throughout the day, and to be healthy forever, which is a great blessing for all.

On January 26, 2019, a nationwide ecological charity hashar was held at Andijan Machine-Building Institute to ensure the execution of the decree of the Cabinet of Ministers of the Republic of Uzbekistan No.41-F dated January 22, 2019.

At present students of all higher educational institutions are having winter exams. However, many students spent their valuable time to this charitable hashar and helped teachers and the staff in cleaning the territory of the institute. It is understood from this that today's youth are not indifferent to the future of the country, but are directly involved in the processes involved in the ongoing reforms for the country's prosperity and accountability.
